Computations in Physics
New York State Section of the American Physical Society

113th Topical Symposium
September 11 – 12, 2015

This conference explores computational methods in physics as applied by researchers, educators and industry. Computational capabilities have been exploding during the past decades. The conference kicks off with a historic view into Computational Physics. Talks include techniques in Solid State Physics, Medical Physics, Quantum Physics and even the business world. Vassar College offers a unique perspective as one of the Seven Sisters Colleges.

Keynote Speaker at Dinner, Friday 6:30 pm
Prof. Marjatta Lyyra from Temple University

Groundbreaking Contributions of Critical Importance by Female Scientists during the 20th Century
